## CASE Study • MODERN BEAUTY

**NAME & POSITION:** Helen Whyte, Director of Sales

**COMPANY NAME:** Modern Beauty

**TIME TRAINING ON PROGRAM:** 1 1/2 years

**LOCATION:** Calgary, AB

### OBJECTIVES

- Investing in our people is the best investment we can make.
- We needed something our team could connect to daily professional development that our reps can access from anywhere.
- I was looking to become a better manager and leader of the team. I also wanted to get our entire sales team on the same page and have new ideas for sales meetings and running the team.

### SOLUTIONS

- We have the whole sales team training on the platform along with all the managers who are also on monthly leadership support calls with the Cardone Canada team.
- When I find modules I love and find value in, I share them with the team. We discuss it in meetings and get the team to tell us what they got out of it.
- Training is discussed, shared and mentioned daily and weekly. Manager meetings are held regularly.
- We run meetings regularly using the content for our internal teams and also run seminars with our clients to help them with their business.

### RESULTS ACHIEVED

#### Sales:

- *Our Calgary and Edmonton teams were both up substantially year over year.*
- *The numbers are even more significant for us considering the state of the market & that we were down sales reps.*

## SALES RESULTS

- We've also seen that our newer salespeople have accelerated growth because of the training.
- I do this training every day and I am committed to doing it. This is the best training system I've seen and the Cardone team and the support is amazing!

## STAFF & CULTURE RESULTS

- The team's mindset – our people are looking at these sales roles as a career now. They don't need a formal education as we provide a great opportunity and the real world sales training they need to be successful.
- There is an improvement in how the reps are treating each other and the alignment with managers – mutual respect amongst the team.
- Team members are looking for and asking how they can advance themselves faster.
- Less negativity in the environment in general.
